FLORIDA DEPARTMENT OF EDUCATION

Knott Building, Tallahassee, Florida 32301 (904) 488-5443

Kenneth E. Penrod, Ph.D., Executive Director

#### FORWARD

This is more than a routine update of a similar study published in February 1981. Doctors of Medicine and Doctors of Osteopathic Medicine are listed in separate sections in this report.

This is the third time we have undertaken the task of locating those physicians in Florida who are actively providing care. Each time new sources of data have been discovered, and "knowing who to ask" has allowed better coverage.

It will not be accurate to compare the numbers in this study with those of the 1980 study and assume differences represent real growth. The better count is responsible for at least part of the apparent increase.

While data on physician activities stored in the file of the Department of Professional Regulation are being improved with the passage of time, all too many practitioners have ignored repeated requests for information along with their relicensure. The primary specialty (self designation) is available for, as an estimate, three out of four physicians. Specialty data on nearly all physicians may be found in the American Medical Association Masterfile Directory, and this source has been used to classify most who are unknown in the Department of Professional Regulation file.

Physicians represent an unusually mobile portion of the population, in large part due to moves necessary for training, service obligations and early practice experience. There is no way for a document such as this to be 100 percent accurate.

According to the Department of Professional Regulation MD file, on 20 August 1983 there were 21,036 with Florida addresses holding a current license to practice. (In addition 14,170 hold a current license but have an out-of-state address). Many of these are retired or are otherwise inactive, or somehow are "unknown". The total accounted for in this study is 19,608. This total includes 750 practitioners plus 61 residents employed by the federal government (Veterans Administration and military hospitals)

STATE LIBRARY OF FLORIDA

# SELECTED STATEWIDE TOTALS

who are not required to have a Florida license (although many do). Our total also includes 1,973 residents in training, a large proportion of whom do not yet have a practice license.

This study does not include physicians active in the specialty of Emergency Medicine. Due to many factors including a) excessive mobility, b) groups providing services to multiple hospitals, and c) staffing of the new free-standing outpatient and emergency centers, the count of Emergency Medicine proved enormously difficult to obtain. This effort will be continued, and data on Emergency Medicine will be provided as a Supplement at a later date.

Current membership in the Florida Academy of Emergency Physicians numbers 572, and a rough estimate is that this includes about 80 percent of those active in the specialty which would make the number of the order of 700.

Finally, these counts do not represent a discrete point in time. Completion of this task has taken several months during which changes have occurred. In many cases changes have been incorporated, but at best these data represent a reasonable approximation of the status of physicians in Florida in mid-1983.

OSTEOPATHIC PHYSICIANS PRACTICING IN FLORIDA

AUGUST 1983

BROWARD 1983  
SPECIALIST  
There are several answers to the question, "How many osteopathic physicians are in Florida?".

- o The American Osteopathic Association records 1,218 as of 1 July 1982.
- o The Florida Department of Professional Regulation records 1,163 holding a practice license as of 20 August 1983.
- o This study has been able to document 910 as active in the profession (not including a few employed in emergency medicine--see introduction to this study) in the summer of 1983. Both the American Osteopathic Association Directory and the licensure list contain the names of many physicians who have retired or have left the state in recent years.

Currently the 910 active osteopathic physicians are found in 36 of the 67 counties of the state with 92 percent clustered in 11 counties. Nine of the 36 counties have a single practitioner.

Of the 910 active physicians, 612 (67 percent) are practicing primary care medicine.

There are several answers to the question, "How many osteopathic physicians are in Florida?"

1. The American Osteopathic Association records 1,313 as of 1 July 1962.

2. The Florida Department of Professional Regulation records 1,163 holding a practice license as of 20 August 1962.

3. This study has been able to document 947 as active in the profession (not including a few included in emergency medicine--see introduction to this study) in the summer of 1962. Both the American Osteopathic Association Directory and the license list contain the names of many physicians who have retired or have left the state in recent years.

Currently the 947 active osteopathic physicians are found in 36 of the 32 counties of the state with 25 persons clustered in 11 counties. Nine of the 36 counties have a single practitioner.

Of the 947 active physicians, 672 (87 percent) are practicing primary care medicine.
